US-CL-CURRENT: 399/8, 399/367

ABSTRACT:

PURPOSE: To grasp copying fee of the image forming device with a multiple number of paper feeding devices easily and accurately by storing the paper feeding number for each paper feeding device and copying paper size, and displaying the carrying number and copying price calculated from the stored data.

CONSTITUTION: The size and use of the body to be image formed is detected by first detecting means 75, 86, 88 and a second detecting means 18, counted at a counting means 80 for each size, and the counted data is stored in a storing means 94. The content stored in this storing means 94 is read out at a reading out means 80, specified calculation is carried out at an arithmetic means 80 with various weights for each size, the values are displayed as they are, and also a calculated total value is displayed at a displaying part 90. Thus, the times of use for each paper feeding device can be easily and accurately be known, and appropriate fee for use can be calculated.
